DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. Claim 1, ln. 6, delete -- the -- after "having" and insert -- a -- after "having". This change is to correct for the insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1.

Specifically regarding claim 1, Sudo et al. (6798390) teaches the state of the art of 3D image reconstructing apparatus in fig. 27-33, including the apparatus comprising a lens array (20), image display means (col. 3, ln. 22), assuming a referential viewing distance (col. 6, ln. 9-11), dividing a viewing zone (col. 4, ln. 4-7) and ray tracking (col. 9, ln. 36-38).

Art Unit: 2873

But, Sudo et al. fails to explicitly teach a method further comprising the steps of ray tracking along a line connecting the center of said small area with a base point of a selected convex lens; determining a first cross point of said line connected with said selected lens to surfaces of objects to be displayed as a three-dimensional image; calculating image information on said first cross point; repeating said calculating step on the whole convex lenses; and repeating steps from said ray tracking to just prior step to the present step on respective said small areas, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph P. Martinez whose telephone number is 571-272-2335. The examiner can normally be reached on M-F 7:00 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
